

FAST-NU

Spring 2026

Subject: ML for Robotics (CS-4090)

Instructor: Dr. Maryam Iqbal

Marks (10)

Assignment# 01 (CLO-1)

Class: BCS 8 A

Date: 11th March 2026

Due Date: 11th March 2026

Q1. Explain core machine learning concepts, algorithms, and their relevance to robotic systems and intelligent decision-making. (CLO1)

Data Preprocessing

- a. Acquire a dataset having minimum 1k rows and 4 columns.
- b. Display the data
- c. Check the missing and NaN values
- d. Clean the data (Mean & median both)
- e. Scale the data
- f. Display the data in Python (Before cleaning/after cleaning & after scaling)

Automate, Navigate, Dominate!
